Metallic collection

Attractive colours available for metallic finishes with varying reflection depending upon the angle of incidence of the light.

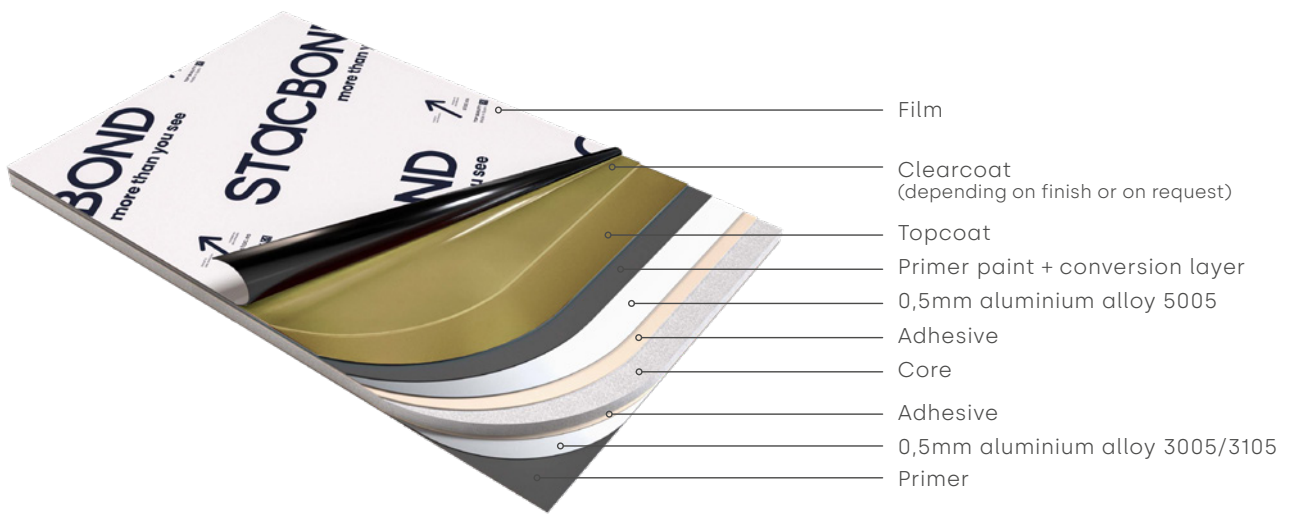

Metallic effects will give your projects a modern and original look for exceptional architecture.

Colores atractivos por su acabado metálico, cuyos reflejos varían sutilmente dependiendo del ángulo de incidencia de la luz.

El efecto metalizado proporciona a sus proyectos un aspecto moderno y original para una arquitectura excepcional.

Couleurs attrayantes grâce à une finition métallique aux reflets variant subtilement en fonction de l'angle d'incidence de la lumière.

L'effet métallisé donne à vos projets une modernité et une originalité favorisant une architecture exceptionnelle.

The STACBOND® panel has an external 5005 and internal 3005/3105 aluminium alloy and is coated with the highest quality paint that offers the highest resistance to ageing.

The manufacture of STACBOND® composite panel follows a controlled process by way of rigorous tests and quality controls.

El panel STACBOND® posee una capa exterior de aluminio de aleación 5005 e interior 3005/3105 y está lacado con pintura de la más alta calidad, ofreciendo la más elevada resistencia al envejecimiento.

La fabricación del panel composite STACBOND® sigue un proceso controlado mediante rigurosos ensayos y controles de calidad.

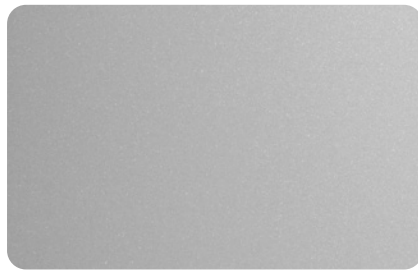

Le panneau STACBOND® possède une couche en aluminium d'alliage 5000 en face extérieure et 3005/3105 en face intérieure, laqué avec une peinture de la plus haute qualité, offrant une résistance plus élevée face au vieillissement.

La fabrication du panneau composite STACBOND® répond à un processus de contrôle rigoureux validé par des essais et des audits de qualités.
